

Submission Package Cover

STEP 5 - Prepare & Submit - Submission Package

> One-page index that maps **every detailed requirement bullet** to the exact file + live evidence. This is the cover sheet evaluators open first.

Repo: <https://github.com/chavdaravi641-byte/sentinel> (`master` @ `d41b2f4` -> live)

Deliverable 1 - Solution Presentation (PPT/PDF) -> `07\_Solution\_Presentation.md`

| Requirement bullet | Where it is | Live proof |

Export: `pandoc 07_Solution_Presentation.md -o Solution_Presentation.pdf` (or Marp).

Deliverable 2 - High-Level Design Document -> `08\_High\_Level\_Design\_Document.md` (supplement `01\_Detailed\_Technical\_Design.md` 984 lines)

| Requirement bullet | Section in `08` | Code |

Deliverable 3 - Own-Feed Demonstration -> `09\_Own\_Feed\_Demonstration.md`

- Own 50 heterogeneous feeds documented (§1: 9 AHM ... 10 N-Guj, 7 RTSP paths, `10.10.0.0/16` + lavfi).

Deliverable 4 - Government-Feed Demonstration -> `10\_Government\_Feed\_Demonstration.md`

- Portal Resources->platform mapping table (§1).

Deliverable 5 - Video & Output Report -> `11\_Video\_Output\_Report.md`

- **Structured route table** (5 rows: timestamp UTC + camera + location + lat/lng + cluster + OCR) + dossier summary `5/5/1/1` + SHA `4eb27109...` + `anpr/search 5 items`.

Deliverable 6 - Submission Links -> `12\_Submission\_Links.md`

- **Source repo:** <https://github.com/chavdaravi641-byte/sentinel> (public, `master`, push verified 2026-09-05).

Evaluator Quick Start (Copy-Paste)

`docker compose up --build -d`

Status: All 6 deliverables complete and pushed. Video recording (Act 0-5) is the only remaining capture step - script provided.
